

RADLEY ELECTRIC, INC.

Terry Radley, CEO

Steve Schuster
Operations Manager

Jackie Reed
Office Manager

Brandon Smith
Sales

Darlene Jacobson
Warehouse Manager

Rick Spivey
Industrial Project Manager

Malcolm Ames
Safety Manager

Barney Stephens
Mechanical Operations Manager

From the small seedling planted by our founder Ernest Radley in 1945, his commitment to Christian values, his vision, struggles and his hard work, our family business has flourished.

Our goal is to give the best 24-hour oil, commercial and industrial services to Southeast Texas and its surrounding areas.

Radley Electric, Inc. is dedicated to providing a safe, stable and professional work environment for our employees.

OILFIELD SERVICES

- » Installation & maintenance of electrical & mechanical equipment associated with all stages of oil production, transportation & refining
- » Automatic tank gauges & tank mixers
- » Variable speed drives & Add-A-Phase controls
- » Oil well pumping, above ground & submergible
- » Salt water disposal systems with pumping skid, drive motor, tank level control, high/low pressure & vibration safety shutdowns
- » Design, fabrication, installation & maintenance of instrumentation & control systems for tank batteries & separators
- » Programmable Logic Controllers (PLC) for turbine meter & Lease Automatic Custody (LACT) controls
- » PLCs for single & multiple locations integrated through radio remote operation
- » Fabrication or refurbishment & installation of your oilfield pumping facilities, including fabricating skids & assembly of the proper power & safety shutdown controls
- » Access to a wide range of electric motors & controls
- » Repairing or replacing all types & makes of pumps & valves, including equipment for handling corrosive chemicals
- » Access to the best available cutting & welding equipment
- » Design, construction & maintenance of high, medium & low voltage poleline circuits, complete with lightning protection & power factor correction capacitors
- » A fleet of pole-setting & bucket trucks for service & installation up to 60 feet

SALES

MOTORS

» We have the best pricing for electric motors with our Worldwide sources from 1/2 HP to 250 HP in both single phase and three phase voltages. Please call for pricing.

BELTS & PULLEYS

» All belts are accessible by order in various sizes through our affiliate company The Belt Source, Beaumont, Texas with an extensive stock to supply industrial needs.

AUTOMATION EQUIPMENT

» REI supplies, installs and maintains automation equipment and systems for local and remote monitoring and shutdown for a range of process systems. Specialists are available to help with the design and implementation of your automation system. We are a source for the following equipment:

- Automation Direct: Programmable Logic Controllers (PLC)
- Major Head Switch: Liquid Level Control
- Murphy Pressure & Level Gauges: High/Low Pressure & Level Switch Gauges

THE HISTORY OF REI

The history of Radley Electric, Inc. begins with its founder, Ernest "Ernie" Elmer Radley. Ernie began his electrical career as a young man of 14, while working for his father, Jess Radley, who was a carpenter and builder of churches.

This early start in electricity sent Ernest to work for the relatively new Gulf States Utilities Company, first as a helper, then a Line Man, then a District Electrician. In 1943, Ernie moved on to World War II shipyard electrical work as a Master Electrician. In 1945 he settled his family in Sour Lake, Texas to found his own company, Radley Electric.

The company began by making oilfield electrical and residential electrical repairs. Ernest's sons, Charley, Howard, Rhea, and Glen, all worked for their father at some point, beginning a tradition of the family-owned and operated business that REI still is today. Howard purchased the company from Ernest when he retired in 1967. His sons, Donnie, Terry and Joe, and his son-in-law Guy Gatewood have all been involved in the progress of Radley Electric, with Terry assuming ownership and becoming CEO in 2001.

Terry continues to serve as the President of the company, ensuring the same philosophies as his father and grandfather: honesty in business and a caring relationship with employees and the community. Radley Electric, Inc. is dedicated to providing dependable and quality service to its clients, now offering oilfield electrical construction and maintenance, including power line construction, instrumentation, PLC control design and automation, installation and repairs for production, refinery, and gas facilities, now with a staff of over 60 employees.
